

ARE YOU PREPARED?

BE READY TO MANAGE FACILITY PROBLEMS:

LEAKY ROOFS | GROUND WATER INTRUSIONS | PLUMBING LEAKS | SPRINKLER MISHAPS | MOLD, SMOKE AND OTHER AIR QUALITY ISSUES

Leaks, floods and air quality problems are bound to happen – too frequently in many facilities. Calling a contractor is the right answer when the problem is large, complex or involves contaminated water.

Being ready to expertly manage everyday issues is the best way to reduce risk and prevent:

- Downtime from contractor delays
- Contractor cost overruns
- Budget problems
- Dissatisfied facility occupants
- Online complaints
- Bad outcomes from inadequate systems
- Indoor air quality Issues

Legend Brands' Ready to Respond™ (R2R) System can help by:

- Standardizing your response to problems
- Documenting your next "best move" based on proven engineered results
- Providing best-in-class solutions
- Identifying gaps in your existing program

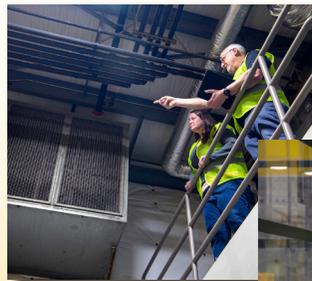

Step 1 – Call our technical experts at 888-208-5401 for a free initial consult about your facility's recurring water damage and air quality issues.

Step 2 – Take advantage of our free quick assessment of your facility's readiness to manage such problems.

Step 3 – Arrange for your facility's Response Capability Assessment, conducted onsite by a Legend Brands technical expert.

Contact us today to learn how we can help your team be truly prepared – for whatever happens!
